

YOU LIVE AT HOME, BUT YOUR NEVER ALONE!

Now you can live alone without the fear of being alone...

With the **Home Alert** Medical Emergency System, an individual can remain independent at home while assuring that they are never alone, with medical and personal assistance close at hand. They can worry less and enjoy their independence knowing someone is waiting to answer their call for help...anytime...24 hours a day...at the touch of a button. Two-way voice communications offers two-way communications via your Home Alert console from anywhere in your home.

Peace of Mind...

"Our mom is growing older but she gets along well. All of her children live out of state, and we felt like we had to call every day to see how she was. With the **Home Alert** Medical Emergency System we all have more peace of mind. Mom gets the help she needs, and we know we'll get an immediate phone call in case of an emergency."

*"I live alone and love it, my kids used to worry about me, but the **Home Alert** System gives them a good reason not to worry. I feel safer too! Knowing that someone is always available anytime I need them."*

How Does It Work...

The **Home Alert** System uses the Capricorn EM-300 Voice Telephone Alert, manufactured for Home Alert. This medical emergency protection is currently protecting over 100,000 customers like you, bringing peace of mind to them and their families.

The Home Alert System

A pendant or wrist band and the EM-300 Home Alert console.

The **Home Alert** System is monitored by *Security Central Nationwide Monitoring* using the new state-of-the-art two-way voice communications. Two-way voice communications offers two-way communications via your Home Alert console from anywhere in your home. When your alarm is activated one of our operators can talk to you, listen to you, and verify whether an actual alarm condition exists.

Two-way voice allows you to talk to the central station and provide important information without having to locate a phone. In a real emergency, getting to a phone can be a difficult thing to do. With two-way voice you can talk to the central station from anywhere in the home.

Your Privacy...

We can't hear or talk to you unless the system has been activated. The alarm system from your home must send a signal before the central station operator can communicate with you.

The System Cost...

The **Home Alert** System with monitoring is leased on a month-to-month basis with no long-term contracts, no setup fee, and no activation fee. **Just \$32.95 per month**

Our Guarantee:

Shop with confidence. Try our **RISK FREE**, your satisfaction is our number one priority. **100% Customer Satisfaction GUARANTEED!**
